

FOLIARTAL Boron

Boron deficiency corrector

CE

GUARANTEED CONTENTS:	% p/p	% p/v
Boron (B) water-soluble:	10,00	13,20
Boron Ethanolamine		

pH = 7,5 ±1
1 l = 1,32 kg.

Properties

FOLIARTAL Boron is a liquid foliar fertilizer rich in boron, that is quickly absorbed and assimilated by the crop. It has been specially developed as a source of this element. Its application stimulates the growth of cambium tissues and apical meristems; it promotes calcium mobility and assimilation, as well as pollen production and fertilization.

FOLIARTAL Boron is recommended for the preventive and curative control of insufficiency states due to deficiency or imbalance in the assimilation of boron.

Crops

FOLIARTAL Boron is recommended for all types of crops: fruit trees (pip and pit fruits), citrus, vegetables, extensive and ornamental crops.

Doses and directions for use

Both radicular and/or foliar applications.

General application rates:

Foliar: 2,5 – 5 l/ha and application

Radicular: 4 – 5 l/ha and application

CROP	DOSES l/ha		APPLICATIONS / FREQUENCY
	Foliar	Radicular	
 Fruit vegetables	1,5 - 3	2,5 - 5	2 – 3 applications since transplant
 Leaf vegetables	1,5 - 3	2,5 - 5	2 – 3 applications since transplant
 Citrus and subtropical crops	2 - 3,5	3,5 - 5	2 – 3 applications in sprouting, preflowering and petals fall
 Fruit trees, olive trees and vines	2 - 3,5	3,5 - 5	2 – 3 applications in sprouting, preflowering and setting
 Extensive and ornamental	1,5 - 3	---	2 – 3 applications

Compatibilities

FOLIARTAL Boron is compatible with most phytosanitary products known, except mineral oils, alkaline reaction products, calcium salts, sulphates and products containing these elements. It is advised to apply alone or carry out a previous test.
