

VASTO 24

Nitrogen Solution Fertilizer With Micronutrients

GUARANTEED CONCENTRATIONS

Total Nitrogen (N)	24,0% w/w
Ureic Nitrogen	12,0% w/w
Ammoniacal Nitrogen	6,0% w/w
Nitric Nitrogen	6,0% w/w
Boron (B)	0,02% w/w
Copper (Cu)	0,05% w/w
Manganese (Mn)	0,06% w/w
Molybdenum (Mo)	0,002% w/w
Zinc (Zn)	0,05% w/w
Soluble Liquide (L.S.)	

PROPERTIES AND APPLICATIONS

VASTO 24 is a liquid fertilizer, rich in nitrogen and microelements, recommended for using in deep and covering fertilization or in fertirrigation, as much in prevention as in the control of deficiencies or unbalances in the nitrogen assimilation. It favours the vegetative development and the assimilation of others nutrients. Due it contents nitrogen in 3 different forms, it guarantees the supply, at the same time, fast (nitric), and prolonged (ammoniacal and ureic).

Its use is recommended in the moments in which crop need more quantity of nitrogen, such as in stages of active growth.

CROPS

VASTO 24 is recommended in every kind of crops but specially in horticultural crops.

APPLICATION AND DOSAGE

VASTO 24 is recommended in covering fertilization in cereals and in fertirrigation, distributing the resultant dose of the fertilizer planning in 2 or 3 irrigations.

In fertirrigation, don't exceed the dose of 1 liter per 100 liters of irrigation water, being the most usual dose of 300-500 cc per 100 liters of water.

INCOMPATIBILITIES

VASTO 24 is compatible with most known phytosanitary products used but is suitable to make a previous test. It is recommended not to be mixed with mineral oils and alkaline reaction products.
